Dental Polis DX – Quasi-Drug (Medicinal Toothpaste for Periodontal Disease Prevention)

"Dental Polis DX" is a medicinal toothpaste specifically developed for periodontal disease through a three-year collaboration between dentists involved in clinical practice and the manufacturer. The propolis extract and licorice extract contained in "Dental Polis DX," along with other active ingredients (tocopherol acetate [Vitamin E], isopropyl methyl phenol) work comprehensively to inhibit the proliferation of periodontal bacteria and the formation of dental plaque, thereby preventing the occurrence of periodontal disease and cavities. It is highly regarded as an essential toothpaste for those suffering from periodontal disease. It suppresses bad breath and gum bleeding, keeping the mouth clean and fresh for an extended period. It promises a unique usage experience.

With a track record of 12 million units sold over 30 years since its release, its effectiveness is proven.

Ingredients: Calcium Hydrogen Phosphate for Toothpaste, Hydrated Silica, Magnesium Phosphate, Sorbitol Liquid, Concentrated Glycerin, Purified Water, Ethanol, Anhydrous Silica, Propolis Extract, Carrageenan, Sodium Carboxymethyl Cellulose, Sodium Lauryl Sulfate, Flavoring (Peppermint), Titanium Oxide, Copper Chlorophyllin Sodium, I-Menthol, Tocopherol Acetate (Active Ingredient: Gum Activation), Isopropyl Methyl Phenol (Active Ingredient: Antibacterial Action), Licorice Extract
