Dental Polis Rinse – Quasi-Drug (Medicinal Liquid Toothpaste)

This medicinal liquid toothpaste combines highly concentrated propolis extract, known for its natural antibacterial properties, with medicinal ingredients such as cetylpyridinium chloride, isopropyl methyl phenol (antibacterial action), and tocopherol acetate (gum activation). It is highly rated for its unique antibacterial stimulation from propolis and the synergistic effects of other ingredients, providing a refreshing sensation throughout the mouth that is not seen with other liquid toothpastes. Free from foaming agents, abrasives, and preservatives.

Ingredients: Purified Water, Ethanol, Concentrated Glycerin, Xylitol, Caramel, Propolis Extract, Licorice Extract, *Camellia Sinensis* Leaf Extract, Polyoxyethylene Hardened Castor Oil, Flavor (Peppermint), Sodium Citrate, Citric Acid, Tocopherol Acetate (Medicinal Ingredient: Gum Activation), Cetylpyridinium Chloride (Medicinal Ingredient: Antibacterial Action), Isopropyl Methyl Phenol (Medicinal Ingredient: Antibacterial Action), Angelica Extract, Copper Chlorophyllin Sodium

Content: 300 ml

Price: 1,800 yen + tax

Recommended for:

- Those suffering from periodontal disease
- Those concerned about bad breath
- Those who feel their mouth is often sticky
- Those whose gums frequently swell
- Oral care when out or during busy times

Usage Instructions:

- ① Remove the top cap and take an appropriate amount (about 10ml, 70% of the cap) into your mouth.
- ② Rinse well in your mouth for about 10-20 seconds.
- ③ After that, brush your teeth and gums.
- ④ After use, wash the cap and close the lid tightly.
- ⑤ Using it before bed can improve the stickiness in your mouth by the next morning.

Using it together with Dental Polis DX (toothpaste), which is excellent at removing plaque, is also effective.
