

Propolis Extract

Bio-Flabon Plus

High-quality propolis raw material, harvested at their own apiary in Brazil, is airlifted to their own factory in Japan while still fresh. Using their unique "alcohol + water" extraction method, they extract all the components of the propolis and allow it to mature over a long period, resulting in a high-purity propolis extract. This type of propolis is widely used.

Ingredients: Propolis Extract (Propolis, Ethanol) (domestically produced)

Nutritional Information (per 100 ml):

Energy: 500 kcal
Protein: 0.9 g
Fat: 13 g
Carbohydrate: 53 g
Sodium chloride equivalent: 0 g
